## Softball Tournaments

**When registering for any of the Softball Tournaments, each coach is asked to PLEASE complete the registration for his or her own specific team !!!**

The problem which we have seen occur every year is that when someone other than the coach of the team (someone such as the organization's President or Treasurer) registers the teams for their organization using their own DASH account, this becomes the only contact that we have for each team. When we then send out the pre-tournament and tournament emails, and the seedings following Saturday's Pool Play games, the only person who will be receiving these is the person who actually registered the team, which is in this situation is not the coach.

No matter how well intentioned the person who registered the team is, if it wasn't the team's coach, we very frequently find that the specific pre-tournament and tournament emails never make it to the proper person. This results in a lot of last-minute confusion and frustration for all parties concerned, and a lot of last minute, and unnecessary phone calls from coaches and parents.

A most unfortunate, and avoidable, situation occurred last summer when someone in an organization (someone other than the actual coach of the team) had mistakenly registered one of their teams for the wrong tournament date. A few days prior to the tournament, the coach of the team called us because he hadn't received his schedule. Unfortunately, the tournament was completely maxed out, and there was just no way for us to add them to the tournament.

**So, the moral of the story:  
Coaches, please complete the tournament registration yourself for your own team.**

Thank you
